

LONG LIFE

TEXT ILES

Dibella. Simply good.
Product catalogue 2025

Our assortment:

Bed linen [from page 12](#)

Terry towels [from page 54](#)

Table linen [from page 68](#)

Kitchen linen [from page 74](#)

Our Good Textiles range ...

... can be found integrated in the respective qualities.

Fair and environmentally friendly contract textiles
produced and certified according to the highest
sustainability standards, such as GOTS and Fairtrade.

„End of life & future innovations“

Dibella Circular Textiles [from page 76](#)

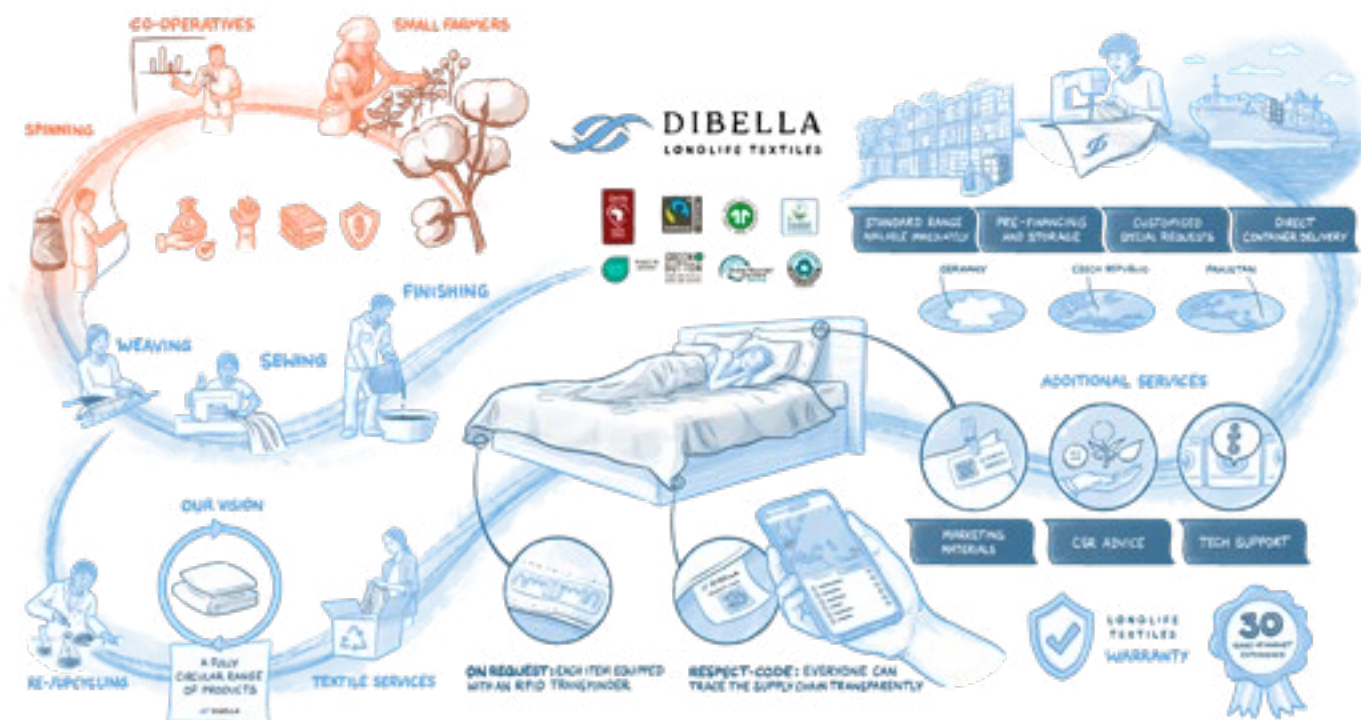

Dear customers,

our textiles are an expression of our values and vision. At Dibella, we combine the highest quality with a special commitment to sustainability. That is why we offer you product ranges, each with its own benefits:

Experience the highest standards already in our 'Longlife Textiles' core range: it is fully labelled with OEKO-TEX® MADE IN GREEN and the GREEN BUTTON. We offer security with regard to compliance with the German Supply Chain Act and the corresponding EU regulations.

Would you like even more added value? In our 'Good Textiles' premium range in terms of sustainability, all products are Fairtrade and GOTS certified. You get transparency from the cotton field to the finished product, far beyond the legal requirements.

And even after their life cycle, we take back the used textiles and return them to the textile cycle. As part of our 'Circular Textiles' programme, we also participate in various projects and conduct research in the field of circular textiles.

Benefit from our special services:

Modular logistics solutions

- The wide standard range can be delivered promptly from our large warehouse in NRW/Germany
- Pre-financing and on-call storage of goods on request
- Short-term realisation of individual special requests in our production facility in the Czech Republic
- Cost optimisation of large orders through direct container delivery

Transparency

- We optionally equip each item with RFID-transponders from Datamars
- On request, we sew in a 'respect-code' that allows the entire supply chain of the textile to be traced transparently

Technical support

- Our textile engineers will be happy to advise you on site regarding the optimum and energy-efficient setting of the washing and drying programmes

Marketing & CSR

- We offer you expert advice and develop customised communication solutions and marketing material for you and your customers

Want to find out more? Everything about Dibella in 140 seconds now in our short video:

If you have any questions, requests or comments, please contact us directly.

Sincerely

your Dibella team

Dibella – for a susta inably good feeling ...

We maintain transparency throughout our supply chain

Our Good Textiles are GOTS/FAIRTRADE certified, our Longlife Textiles are OEKO-TEX® MADE IN GREEN/GREEN BUTTON certified.

1 Small farmers

- Use of organic seeds
- Ecological management of fields
- Higher and secure income
- No pesticides, herbicides and fungicides

2 Coalitions

- Obligation to purchase cotton at fair prices
- Training and support for farmers
- Participation rights
- Investments in regional infrastructure projects

3 Ginning

- Mechanical separation of fibres and seeds
- Processing the seeds into oils
- Cleaning of cotton from foreign particles

6 Dyeing

- Harmless bleaching and dyeing
- Waste-water treatment and purification
- High level of consumer protection by avoiding chemicals that are hazardous to health

5 Weaving

- Crossing of warp and weft threads into fabrics
- Environmental and socially responsible process
- State-of-the-art machinery for particularly high-quality fabrics

4 Spinning

- Mixing and twisting of fibres into yarns
- Socially responsible production
- Compliance with statutory occupational health and safety

8 Dibella

- Product selection according to ecological, social and qualitative criteria
- Brings sustainable, fair and durable textiles to the European market
- Textiles comply with (inter) national supply chain legislation

7 Sewing

- High labour and social standards
- Ensuring occupational health and safety
- Goods/quality control according to international standards
- Highly qualified and trained seamstresses

13 Re-/Upcycling

- Converts the used textiles into recycled polyester and regenerated cellulose fibres, thus contributing to the vision 'From textile to textile'
- Makes it possible to manufacture circular products from old textiles

9 Textile service

- Environmentally friendly washing process
- Sustainable products for textile leasing
- Optimised processes for multiple use

10 Hotel industry

- Offers a fair and ecological product for guests
- Creates a good feeling and experience in the hotel
- Supply chain due diligence compliance

11 Hotel guest

- Uses textiles without harmful residues
- Obtains ethical added value ranging all the way to very small farmers via the fair textile value chain.

12 Textile service

- Collects and sorts B2B used textiles
- Recycles used textiles into a circular process in compliance with legal waste management guidelines

Source: Textile Exchange 2014, © Dibella b.v., *applies to Good Textiles

OEKO-TEX® MADE IN GREEN guarantees the best social and ecological standards from the weaving mill (shown in blue) and is the cornerstone of the Dibella assortment range. In addition, OEKO-TEX® MADE IN GREEN forms the basis for the GREEN BUTTON state seal.

For our organic Fairtrade goods (which covers the entire supply chain from the small farmers onwards), we source the cotton from the Chetna cooperative in India.

This sustainably (regeneratively) and fairly grown cotton is processed locally in GOTS-Fairtrade certified companies – this results in the highest possible sustainability standard ever.

Bed linen

You will receive our bed linen in 100 % cotton:

- Natural raw material
- High moisture absorption
- Pure cotton can be processed very easily and reintroduced into the cycle

and made of blended fabric:

- Particularly long service life
- Energy savings in reprocessing

Bed linen from Dibella have been specially designed for use in textile services for industrial laundering.

Special features in the material composition and construction of the fabric ensure high process reliability and maximum service life.

The selected fabric blends, developed by our specialists and continuously checked by our quality management, maintain an optimal appearance, high brilliance and pleasant comfort throughout their entire usage cycle.

Zero Pre-wash	>	No separate pre-wash necessary
Easy Ironing	>	Efficient ironing results
Low Shrinkage Effect	>	Reduced shrinkage
Easy Identification	>	Identification by attaching latest chip technology
Brilliant White	>	Stable high whiteness
Low Pilling	>	Outstanding gloss and excellent touch

Sustainability in practice

- > Textiles without residues hazardous to health
- > Ethical added value via the fair textile value chain down to the smallest farmer

* Source: Textile Exchange 2014.

Our hotel textiles. Sustainable. Fair. Good.

For our particularly sustainable textiles, we at Dibella combine the high standards of GOTS and FAIRTRADE. The social and environmental standards of these two independent organisations apply along the entire cotton value chain. The result is textiles that are produced sustainably and fair.

Sustainable textiles protect health and the environment - both at home and in the country of origin. The farmers cultivate their fields ecologically, without the use of dangerous pesticides and free from genetically modified seeds. Strict environmental standards are observed in the factories. For example the use of hazardous chemicals is banned, and waste water is treated.

Sustainable textiles improve the living and working conditions of many people. Fair trade enables small farmers in the global south to earn a higher income. Defined social standards also apply to the processing of cotton. Neither child nor forced labour is permitted in the factories. High standards of occupational safety, fire prevention and evacuation regulations are reliably implemented.

Simply good! Good Textiles.

Pillowcases and duvet covers with TENCEL™ fibres

60 % TENCEL™ Lyocell, 40 % cotton,
ring yarn, combed, mercerised, white, 150 g/m²

Virginia

Plain satin,
thread count TC 250

Lyocell – also known as **TENCEL™** – is a so-called "man-made cellulose fibre", i.e. a fibre industrially produced from natural raw materials. It is made from wood from forestry and is completely degradable in soil, compost and also in freshwater and seawater.

Botanical origin

TENCEL™ Lyocell and modal fibers come from the renewable raw material wood – from natural forests and sustainably managed plantations. The wood and the pulp used by the Lenzing Group come from certified and controlled sources.

Measurements and hand assessments show that TENCEL™ modal fibers are twice as soft as cotton. The softness of TENCEL™ modal fibers lasts longer and withstands repeated washing and drying compared to cotton.

Sustainable production of TENCEL™ Lyocell fibers

TENCEL™ Lyocell fibers have made a name for themselves because of the environmentally conscious closed-loop manufacturing process that converts pulp into cellulose fibers with high resource efficiency and low environmental impact. This solvent spinning process recycles the process water and returns more than 99% of the solvent to the production cycle.

*This product contains TENCEL™ Lyocell fibres.
TENCEL™ is a trademark of Lenzing AG.*

Terry towels

Efficient in use and sophisticated in look and feel, bathroom textiles from Dibella meet the high demands of textile service for terry towelling products.

The special quality ensures smooth processing, high productivity and a long service life in industrial laundries.

The textiles retain their comfort properties, which users particularly appreciate, and are fluffy and absorbent throughout their entire service life.

Table linen

The high-quality textiles are produced with great expertise, ensuring stable production processes and long service lives in industrial laundering.

The range of dimensionally stable shapes and washable colours allows trouble-free handling of the textiles in the complete production process, including use by the customer.

- | | | |
|-----------------|---|---|
| Twisted Yarns | > | Manufactured from durable full-twist yarns |
| Round Fit | > | Specially produced, ironing direction marked |
| Yarn-dyed | > | Identical colours for different sizes |
| Combed Cotton | > | Combed quality yarns |
| Mercerized | > | Increased gloss |
| Closed Selvedge | > | Efficient ironing results by using closed selvedges |

blue-white, 200 g/m²

Responsibility along the entire supply chain: circular economy at Dibella.

With the OEKO-TEX® MADE IN GREEN and GREEN BUTTON certifications, Dibella ensures compliance with the requirements of the German Supply Chain Act (Lieferkettensorgfaltspflichtengesetz). However, we also bear responsibility after the end of the utilisation cycle in the textile service, ensuring that used textiles from the laundry industry are returned to a new, circular cycle in order to make the entire textile chain more sustainable.

Our Goal: From textile to textile

Mission and vision

We want to take responsibility and take textile recycling to a new level. Our vision is: from textile to textile. Through upcycling we want to enable new textiles for our industry.
